

General Terms and Conditions of Use

In accordance with European Union directives, the resources provided by the Hungarian Government enabled the Hungarian Meteorological Service (OMSZ) to implement an open meteorological data policy from 1 January 2021.

According to this, OMSZ provides its monitoring and measurement data, the forecasts of the models run by OMSZ, and other weather and climate information free of charge and available for free use via the open data server (Meteorological Database) odp.met.hu.

Terms of use

All information on the OMSZ open data server (Meteorological Database) and on its websites is protected by copyright.

The meteorological measurement data and information available in the Meteorological Database and downloaded from there can be used freely, free of charge, with the indication of the source (Hungarian Meteorological Service, OMSZ) *.

*** The obligation to indicate the source references applies to all data, meteorological information and other services of the OMSZ that are used without change. Source references should be included even if the data are only partially presented, if simple mathematical operations are used to derive them (averages, sums, etc.), or if only the data format has been changed.**

OMSZ may be cited as a source in graphical or textual form. The source data should be placed directly next to the information used and should comply with the following layout requirements:

Text: Source: Hungarian Meteorological Service

Graphically: the OMSZ logo

In the case of substantial transformation, processing, production of new information or other adaptation, the OMSZ expects to be mentioned in a central reference list or in an imprint.

Examples of the indication of changes in available data and information in the Meteorological Database:

"Database: Meteorological Database, OMSZ; graphically reproduced data"

"Database: Meteorological Database, OMSZ; averaged for each value"

"Database: Meteorological Database, OMSZ; own elements added"

"Database: Meteorological Database, OMSZ; own intellectual product added" etc.

If the data and information stored in the Meteorological Database managed by OMSZ is used or transformed in a way that is not appropriate for its intended purpose, the source references shall be deleted. This applies in particular to weather hazard warnings not transmitted by OMSZ, where OMSZ has no guarantee or effect that they will be delivered to all users continuously and without delay.

Contact

Your questions and comments related to the data and information in the Meteorological Database are welcome to the email address odp@met.hu.
