

DESCRIPTION OF FILE

Content of file: Highest, lowest, average values of the maximum UV index values forecasted for the regions of Hungary and their qualified levels.

CHARACTERISTICS OF FILES

Filenames: fuhS<YYYYMMDD>_<HHMM>.txt, where

<YYYYMMDD>_<HHMM>: date and time of the file

Update frequency: twice a day

Format: txt, xml

Uncertainty of measurement/methodology:

Contains uncertainties from the forecast (cloud).

METHODOLOGY

Regard to the astronomical parameters, the forecasted total ozone content and the cloud cover, the daily maximum of the UV index is determined, and then the highest, lowest, average value of the daily maximum is derived for the regions of Hungary.
